Part C Decision Tree

Did formal testing indicate a 50% delay in any area of development?

→ Yes=Part C

If No-Is there a diagnosed condition that is likely to result in a developmental delay?

→ Yes=Part C by Diagnosed Condition

If No-Are there unique circumstances that may not be captured by testing?
- Traditional measures of eligibility have been attempted but did not yield reliable or valid scores.
- No testing was completed in the area, due to the child's young age.
- Traditional measures are unavailable and observation was used to evaluate the following areas:
    - Growth and Feeding (atypical feeding patterns)
    - Sensory and Regulation (Sleep and sensory processing)
    - Social/Emotional (social interactions)
    - Motor (asymmetry, motor planning, tone)
    - Communication (atypical speech patterns-echolalia)
    - Sensory Impairment (Hearing or Vision)

Other_____

→ Yes=Part C by Informed Clinical Opinion
